BRIEF INTRODUCTION

Located in ShanShi Industrial park of Taizhou City, — border on the picturesque scenery East China Sea, China • GuangLu Electrical Co., Ltd. Enjoys convenient transportation by water, land and air. The company occupies 25 thousand square meters and owns advanced producing equipments, it is a company specialized in electrical machinery manufacturing with all kinds of classifications, it is a member of Small and Medium-Sized Enterprises Electrical motor factory in the whole nation, it is a cooperated company with ShangHai Testing & Inspection Institute .

Our company was established in 80's, it was listed in the important industry member of key enterprise factory in WenLing, it is in the front of fifth strongest factory in DaXi. Furthermore, the company own excellent staff and a powerful scientific and technical system, advanced mode of production, hi-efficiency production facilities, continually renew testing equipments and consummate modernized management system. All products are according to the International IEC standard, it has arrived to the advanced level in the international same area. It has passed ISO9001:2000 International Quality Conformity, and got CCC 、CECP、CE Certificate, it is one of the biggest exported company in the Small and Medium Size in the Electrical area. In 2009,it was award "National Hi-Tech enterprise", YX3 series -high efficiency electrical motor has listed in the Energy Conservation Project.

Guanglu company specially produce IE2 series,Gost standard motor ,YX3 high efficiency motor, GM removeable single phase aluminium body motor,Y3,YZR3 series ,brake motor, double speed motor, vibrator motor, single phase series, Vibrators, high frequency vibrator stick, cutter, grinder ,etc. Guanglu products were saled to all over the world ,such as Europea, Middle east and our neighbors, the products are welcomed by customers and with favorable comments. In order to manufacture high quality products, Guanglu company introduced high efficiency production lines and increased new machining centers, such as lathe, automatic high speed stamping system, microcomputer test center, Coordinate Measurement System, control strictly from material select, machining ,manufacture, assembly to test, make the control system computerized and automated.

Guanglu make Science and technology as foremost, people oriented , improve quality constantly, most of products are superfine and high quality, are saled with good reputation in domestic and overseas market.

Guanglu company pursuing improvement spirit, advancing innovate independently, speed up the adjustment for products' structure, develop high-tech products energetically, perfect the technology, operate in high efficiency, with positive attitude as enterprise's belief, and serve customers with satisfied and excellence products and loyal service as the company tenet.

To manufacture high quality products, GUANGLU introduced numbers of equipments, as machining center, microcomputer test center, ect.
From material select, machining, manufacture, assembly to test, every procedure is strictly controlled.
The quality control is computerized and automated.

SINGLE-PHASE ASYNCHRONOUS MOTOR

**TMYL**

TMYL SINGLE-PHASE ASYNCHRONOUS MOTOR

TMYL series capacitor asynchronous motors are single-phase the motors of capacitor start and run. Main features: mall size high capacity, strong starting torque, high power factor and efficiency, safety and reliability in running, simple construction and easy maintenance, it possess frame No. and capacity as three-phase asynchronous motors.

The rated frequency of the motors in 50Hz while the rated voltage is 220V.

This series motors are of totally enclosed fan-cooted structure, class B insulation, IP54 degree of protection and IC411 method of cooling. The mounting dimensions of the motors are all in conformity with IEC standards. Mounting types: IM B3 IM B5 IM B35 IM B14 IM V1 IM V3 IM V5 IM V6 IM V18 IM V19 IM V36.

GMYL series motors are suitable for machines and equipments such as full load start.

TMYC

SINGLE-PHASE ASYNCHRONOUS MOTOR

TMYC SINGLE-PHASE ASYNCHRONOUS MOTOR

Single-phase capacitor-start asynchronous motor. Series GMYC, is totally enclosed fan-cooled type. The starting torque of motors is 2-3 times as rated torque. The motors give excellent performance such as low in noise, low in temperature-rise, high in overloading capacity and convenience in maintenance. It may widely application in all types of small machine tools compression pumps refrigerators and the equipment which need bigger starting torque, etc.

They are wonderful utilities for family workshop where only single-phase power are available. This series motors adopts class B insulation, IP54 degree of protection and IC0141 method of cooling. The rated frequency of the motor is 50Hz while the rating voltage is 220V.

The mounting dimensions of the motors are all in conformity with IEC standards. Mounting

Types: IM B3, IM B5, IM B35, IM B14, IM B34, IM V1, IM V3, IM V5, IM V6, IM V18, IM V19, IM V36. Working conditions: Altitude above sea level not over 1000m, Altitude temperature not over 40℃.

TMY

SINGLE-PHASE ASYNCHRONOUS MOTOR

**TMY**

TMY SINGLE-PHASE ASYNCHRONOUS MOTOR

TMY series run capacitor asynchronous motor, is produced according IEC standard, with many feature as simply structure, steady running , advanced technical indicators and easily maintenance. Fitting for household appliances , air compressor, pump, blower ,recorder instrument etc.

GMY series motor is TEFC (totally enclosed fan cooling), IP 55, INS . CL.F.Terminal box at top.

GMYL

SINGLE-PHASE ASYNCHRONOUS MOTOR

GMYL SINGLE-PHASE ASYNCHRONOUS MOTOR

GMYL series capacitor asynchronous motors are single-phase the motors of capacitor start and run. Main features: mall size high capacity, strong starting torque, high power factor and efficiency, safety and reliability in running, simple construction and easy maintenance, it possess frame No. and capacity as three-phase asynchronous motors.

The rated frequency of the motors in 50Hz while the rated voltage is 220V.

This series motors are of totally enclosed fan-cooted structure, class B insulation, IP54 degree of protection and IC411 method of cooling. The mounting dimensions of the motors are all in conformity with IEC standards. Mounting types: IM B3 IM B5 IM B35 IM B14 IM V1 IM V3 IM V5 IM V6 IM V18 IM V19 IM V36.

GMYL series motors are suitable for machines and equipments such as full load start.

GMYC

SINGLE-PHASE ASYNCHRONOUS MOTOR

GMYC

GMYC SINGLE-PHASE ASYNCHRONOUS MOTOR

Single-phase capacitor-start asynchronous motor. Series GMYC, is totally enclosed fan-cooled type. The starting torque of motors is 2-3 times as rated torque. The motors give excellent performance such as low in noise, low in temperature-rise, high in overloading capacity and convenience in maintenance. It may widely application in all types of small machine tools compression pumps refrigerators and the equipment which need bigger starting torque, etc.

They are wonderful utilities for family workshop where only single-phase power are available. This series motors adopts class B insulation, IP54 degree of protection and IC0141 method of cooling. The rated frequency of the motor is 50Hz while the rating voltage is 220V.

The mounting dimensions of the motors are all in conformity with IEC standards. Mounting

Types: IM B3, IM B5, IM B35, IM B14, IM B34, IM V1, IM V3, IM V5, IM V6, IM V18, IM V19, IM V36. Working conditions: Altitude above sea level not over 1000m, Ambient temperature not over 40°C.

GMYY

SINGLE-PHASE ASYNCHRONOUS MOTOR

GMYY SINGLE-PHASE ASYNCHRONOUS MOTOR

GMYY series run capacitor asynchronous motor, is produced according IEC standard, with many feature as simply structure, steady running , advanced technical indicators and easily maintenance. Fitting for household appliances , air compressor, pump, blower ,recorder instrument etc.

GMYY series motor is TEFC (totally enclosed fan cooling), IP 55, INS . CL.F.Terminal box at top.

MYL SINGLE-PHASE ASYNCHRONOUS MOTOR

MYL series capacitor asynchronous motors are single-phase the motors of capacitor start and run. Main features: mall size high capacity, strong starting torque, high power factor and efficiency, safety and reliability in running, simple construction and easy maintenance, it possess frame No. and capacity as three-phase asynchronous motors.

The rated frequency of the motors in 50Hz while the rated voltage is 220V.

This series motors are of totally enclosed fan-cooted structure, class B insulation, IP54 degree of protection and IC411 method of cooling. The mounting dimensions of the motors are all in conformity with IEC standards. Mounting types: IM B3

MYL series motors are suitable for machines and equipments such as full load start.

TECHNICAL DATA OF MYL SERIES

MYC SINGLE-PHASE ASYNCHRONOUS MOTOR

Single-phase capacitor-start asynchronous motor. Series MYC, is totally enclosed fan-cooled type. The starting torque of motors is 2-3 times as rated torque. The motors give excellent performance such as low in noise, low in temperature-rise, high in overloading capacity and convenience in maintenance. It may widely application in all types of small machine tools compression pumps refrigerators and the equipment which need bigger starting torque, etc.

They are wonderful utilities for family workshop where only single-phase power are available. This series motors adopts class B insulation, IP54 degree of protection and IC0141 method of cooling. The rated frequency of the motor is 50Hz while the rating voltage is 220V.

The mounting dimensions of the motors are all in conformity with IEC standarde. Mounting

Types: IM B3. Working conditions: Altitude above sea level not over 1000m, Altitude temperature not over 40℃.

YY SINGLE-PHASE ASYNCHRONOUS MOTOR

YY series run capacitor asynchronous motor, is produced according IEC standard, with many feature as simply structure, steady running , advanced technical indicators and easily maintenance. Fitting for household appliances , air compressor, pump, blower ,recorder instrument etc.

YY series motor is TEFC (totally enclosed fan cooling), IP 55, INS . CL.F.Terminal box at top.

TECHNICAL DATA OF YY SERIES

GXVP

SINGLE-PHASE
ASYNCHRONOUS MOTOR

GXVP

GXVP SINGLE-PHASE ASYNCHRONOUS MOTOR

Along with the raising level of productivity, and the automation of production equipment, intelligent,digital growing demand, Motors as the main power source, the market demand for power output of adjustable requirements keep increasing.

Following the market demand, our company developed a new digital frequency GXVP series electrical motor , it adopted a reasonable adjustment method, and it designed more perfect in electromagnetism~structure~insulation, so then it can be adjusted with different frequency at the different work conditions, and save the energy in a certain extent.

GXVP digital frequency electrical motor which adopted the standard design-4P, 50Hz, the system of input should be 220V (50Hz) or 230V (60Hz) in single phase, and it can be customized.

MAIN TECHNICAL DATA

Type	Rated Power kW	Frame Size	Input Volt V	Input Current A	Rated Torque N.m	Speed Range	Speed Range Under Constant Torque	Speed Range Under Constant Power	IP DEGREE
GXVP	0.25	71	Single phase 220V/50Hz 230V /60Hz	2.0	1.6	30□ 3600 r/min	450□ 1500 r/min	1500□ 3600 r/min	IP55
	0.37			3.0	2.3				
	0.55	80		4.4	3.5				
	0.75			5.7	4.8				
	1.1	90		8.3	7.0				
	1.5			11.0	9.6				
	2.2	100		16.0	14.0				
	3			21.0	19.1				
	4	112		28.0	25.5				

Remarks: If the system is requested to run at lower speed under constant torque, it is more suitable to order the inverter motor with forced vent integrated with controller. The speed can reach 30r/min under constant torque.

MAIN CONTROL DATA

Speed Set Input Means: 5K potentiometer, 0–5VDC; 0–10VDC; 5V PWM (Separate) , RS485 (Separate)

Speed Set Differentiate Rate: 3r/min

Logic Control Input: Start/Stop; Clockwise/Counter-clockwise turn

Output Signal: Working Frequency Output (5V square wave); RS485; "Normal" Signal

Protection Function: Over-current Protection, Regenerative Over-volt Protection, Motor Over-temperature Protection, Controller Over-temperature Protection

Working Ambient: less than 90%RH (no dew)

Storage Temperature: -20℃ ~ +65℃

KEY	NAME	FUNCTION
PROG/ESC	Programming key	The preferences menu inter or exit
DATA/ENT	Enter/Switch key	Display the preferences
▲	Increase key	Date/function code increasing
▼	Reduce key	Date/function code reduce
>>	Shift key	When the parmeter revised, can choose the digit place
FWD	Prograde running key	Under key board operation, take prograde running
REV	Reversal running key	Under key board operation, take prograde running.
STOP/RST	Stop/reset key	When it's running, press this key can stop it; when it's warning, press this key can restet operation blinking number

Function code examine, resire explanation

FUNCTION DISPLAY EXPLAIN

Display item	Explanation
P50.00	Show the output frequency is 50.00Hz
H50.00	Show the setting frequency is 50.00Hz
C003.0	Show the output current is 3.0A
0 1440	Show the output speed is 1440r/min
0510.1	Show the direct current voltage is 510.1V
U380.0	Show the output voltage is 380.0V
E035.0	Show the frequency converter's temperature is 35.0℃
00105	Show the attribute is 105
R050.0	Show the PID goal value is 50.0%
8048.0	Show the PID feedback is 48.0%
00012	Show it's running time is 12 hours
00108	Show the frequency converter has run total 108 hours
